

comprehensive file organization system

Here's a ****comprehensive file organization system**** that scales across all our UI/UX projects while maintaining consistency with our existing UrbanVoice structure. I'll expand it into a universal framework:

****Master UI/UX Folder Structure****

```markdown

UIUX\_MASTER/

```

| | L;->Custom_Fonts/
| | |;->Icons/
| | | |;->Material_Icons/
| | | |;->Custom_SVGs/
| | |;->Stock_Media/
| | | |;->Unsplash_Local/
| | | |;->Illustrations/
| | |6_Documentation/
| | | |;->Style_Guides/
| | | | |;->Brand_A/
| | | | |;->Brand_B/
| | | |;->Project_Notes/
| | | | |;->Meeting_Minutes/
| | | | |;->Technical_Specs/
| | ...
| ---
|

```

### ### \*\*Key Enhancements Over Previous Structure\*\*

#### 1. \*\*Cross-Project Scalability\*\*

- Reusable components in `/2\_UI\_Libraries` work across all projects
- Design tokens sync via `0\_DesignOps/DesignSystem\_Templates`

#### 2. \*\*Universal Version Control\*\*

```

```bash
# Git LFS setup for large files
git lfs track "*.psd" "*.sketch" "*.mp4"
```

```

#### 3. \*\*Atomic Design Implementation\*\*

- Atoms: `/2\_UI\_Libraries/Atomic\_Components/Buttons`
- Organisms: `/1\_ClientWork/UrbanVoice\_DesignSystem/Components`

#### 4. \*\*Automated Export Workflow\*\*

- Use [Figma Auto Export] (https://www.figma.com/community/plugin/735725507257586397/Auto-Export) to sync with `/4\_Production/Exports`

#### 5. \*\*Accessibility Integration\*\*

- WCAG reports in `/3\_UX\_Research/A11Y\_Reports`
- AXE logs in `0\_DesignOps/Performance\_Logs`

### ### \*\*File Naming Convention\*\*

Apply this globally:

```

[Project]_[Component]_[Type]_[Size]_[Date]_[Version].[ext]
```

```

****Example**:**

```

UrbanVoice_Button_Primary_Desktop_20230815_v2.1.fig
HealthcareApp_Icon_Calendar_Mobile_20230815.svg
```

```

### ### \*\*Collaboration Protocol\*\*

#### 1. \*\*Figma Branching Strategy\*\*

- Master → Staging → Feature Branches
- Sync branches to `/0\_DesignOps/Version\_Control`

#### 2. \*\*Adobe XD Cloud Libraries\*\*

- Store shared colors/fonts in `/0\_DesignOps/DesignSystem\_Templates`

#### 3. \*\*Design Handoff\*\*

- Use Zeplin links in `/4\_Production/Prototypes/Figma\_Links`

---

### ### \*\*Critical Tools Integration\*\*

#### Critical Tools Integration

| Tool       | Purpose              | Folder Mapping                 |
|------------|----------------------|--------------------------------|
| Figma      | Primary design tool  | /1_ClientWork/*/Figma/         |
| Adobe XD   | Advanced prototyping | /4_Production/Prototypes/      |
| Jira       | Task tracking        | 6_Documentation/Project_Notes/ |
| Zeroheight | Design system docs   | 6_Documentation/Style_Guides/  |
| ImageOptim | Asset compression    | 4_Production/Exports/          |

### ### \*\*Backup & Sync Strategy\*\*

#### 1. \*\*Local NAS\*\*:

- RAID 1 mirror of `/UIUX\_MASTER`

#### 2. \*\*Cloud Sync\*\*:

```
```bash
rclone sync ./UIUX_MASTER remote:UIUX_MASTER \
  --exclude "*.sketch~" \
  --progress
```
```

#### 3. \*\*Cold Storage\*\*:

- Quarterly 7z archives with parity files:

```
```
UIUX_Q3_2023.7z
UIUX_Q3_2023.par2
```
```

---

### ### \*\*Onboarding New Designers\*\*

#### 1. \*\*Readme.md\*\* in root folder with:

```
```markdown
# Design System SOP
```

- Use Figma for wireframing
- XD for high-fidelity prototypes
- Sync assets daily to /4_Production

2. **Starter Kit** in `0\_DesignOps/DesignSystem\_Templates`

- Plugins list
- License keys
- Font installation guide

This system ensures:

- **100% Component Reusability**
- **Cross-Project Consistency**
- **Version Conflict Prevention**
- **Enterprise-Grade Backup**

Need me to create a batch script to auto-generate this structure?
