

folder structure and organization system

UrbanVoice_DesignSystem

Here's a professional folder structure and organization system for our design files, optimized for collaboration and version control:

Folder Structure
```

```
UrbanVoice_DesignSystem/
├── 0_ProjectDocs/
│ ├── Project_Brief.pdf
│ ├── SDG_Alignment.md
│ ├── Technical_Specs/
│ │ ├── Jami_API_Docs/
│ │ └── Performance_Requirements.pdf
│ └── 1_Wireframes/
│ ├── Low_Fidelity/
│ │ ├── Mobile/
│ │ │ ├── 01_Home_LoFi.fig
│ │ │ └── 02_Chat_LoFi.fig
│ │ └── Desktop/
│ ├── High_Fidelity/
│ └── User_Flows/
│ └── Telemedicine_Flow.xml
├── 2_Mockups/
│ ├── Seasonal_Themes/
│ │ ├── Spring/
│ │ │ ├── Spring_Home.psd
│ │ │ └── Spring_ColorProfile.json
│ │ └── Summer/
│ ├── Components/
│ │ ├── Navigation_Bar.psd
│ │ └── Video_Grid.sketch
│ └── Responsive_Breakpoints/
│ ├── 320px_Mobile/
│ └── 1440px_Desktop/
├── 3_StyleGuide/
│ ├── Typography/
│ │ ├── NotoSansBengali.otf
│ │ └── Type_Scale.json
│ ├── Color_Palettes/
│ │ ├── Seasonal_Gradients.ase
│ │ └── Accessibility_Report.pdf
│ └── UI_Components/
│ ├── Buttons_Library.fig
│ └── Icon_Set.svg
└── 4_Assets/
```

### ### \*\*Key Organization Principles\*\*

#### 1. \*\*Version Control\*\*

- Use semantic versioning: `v[Major].[Minor].[Patch]`
- Archive older versions monthly
- Naming convention: `YYYYMMDD\_Description\_vX.X`

#### 2. \*\*File Naming Standards\*\*

```

[Project]_[Category]_[Type]_[Version]_[Date].[ext]

Example: UrbanVoice_Navigation_Mobile_v1.2_20230815.fig

```

#### 3. \*\*Collaboration Workflow\*\*

- \*\*Figma\*\*: Keep master files in cloud with branching
- \*\*Adobe CC\*\*: Use Libraries for seasonal color themes
- \*\*Git LFS\*\*: For large assets (>100MB)

#### 4. \*\*Design System Management\*\*

```json

// Design_Tokens.json

```
{
  "colors": {
    "spring": {
      "base": "hsl(168, 60%, 80%)",
      "contrast": "#2C3E50"
    }
  },
  "breakpoints": {
```

```

    "mobile": "320px",
    "tablet": "768px"
  }
}
```

```

## 5. **Performance Tracking**

- Include Lighthouse reports in `/ProjectDocs/`
- Maintain asset optimization logs:

```

WebP_Conversion_Log.csv
Column 1: Original Size
Column 2: Optimized Size
Column 3: Quality Setting
```

```

Essential Tools

1. **Design File Viewer**

Use [Figma Mirror](<https://www.figma.com/mirror>) for mobile previews

2. **Version Comparator**

[Adobe Version Compare](<https://helpx.adobe.com/creative-cloud/help/version-compare.html>)

3. **Asset Optimizer**

[ImageOptim](<https://imageoptim.com/mac>) for automated compression

4. **Design Handoff**

[Zeplin](<https://zeplin.io/>) for developer specs

Backup Strategy

1. **Local**

Time Machine (macOS) / File History (Windows)

2. **Cloud Sync**

Structure mirroring:

```

Google Drive/
├── Client_Projects/
│   └── UrbanVoice/
│       ├── Current_Work → Symlink to local folder
│       └── ARCHIVE/
```

```

### 3. **Cold Storage**

Quarterly ZIP backups to external drives:

```

UV_Design_Q3_2023.zip
├── MD5_Checksums.txt
└── Inventory_List.csv
```

```

Developer Handoff Checklist

1. In `/6\_Exports/Developer\_Handoff` include:
 - CSS Custom Properties for seasonal themes
 - SVG icon spritesheets with ARIA labels
 - Network-aware loading sequence diagram

```
```mermaid
sequenceDiagram
 User->>+App: Request HD Video
 App->>+Network: Check Connection
 Network-->>-App: 3G Detected
 App->>+Jami: Request 360p Stream
 Jami-->>-App: Deliver Optimized Feed
```
```

This structure ensures:

- 1-click access to any design element
- Full audit trail of changes
- Seamless handoff between design/dev teams
- Compliance with WCAG 2.1 documentation

Would you like me to create a ZIP template with this structure for immediate use? - feel free to ask.
