

to design the websites UI can I use the Penpot along with any AI builders?

****Yes, you can use Penpot alongside AI builders to design a website's UI.**** Penpot's open-source flexibility and AI-driven tools complement each other, enabling streamlined workflows, automation, and enhanced creativity. Below is a detailed breakdown of how to integrate Penpot with AI builders, along with practical examples and tools to consider:

****1. Penpot's Core Strengths for UI Design****

Penpot is a ****free, open-source design tool**** that bridges design and development workflows. Key features include:

- ****Real-time collaboration**** for teams to work simultaneously on projects .
- ****CSS/SVG-native design systems****, ensuring designs translate smoothly to code .
- ****Self-hostable or cloud-based deployment****, offering privacy and customization options .
- ****Templates and libraries**** for rapid prototyping .

These features make Penpot ideal for creating developer-friendly interfaces, especially when combined with AI tools for automation or ideation.

****2. AI Builders to Pair with Penpot****

Here are three AI-driven tools and strategies to enhance your Penpot workflow:

****a) Create.xyz****

- ****What it does****: Generates design tools (e.g., color palettes, UI components) via natural language prompts. For example, ask for a “contrast palette for a green theme,” and it produces code-ready outputs .
- ****Integration with Penpot****:
 - Use Create.xyz to generate AI-powered color schemes, icons, or layouts.
 - Export these assets (e.g., SVG files, CSS snippets) and import them into Penpot's workspace .

****b) ChatGPT or Custom AI Plugins****

- ****What it does****: Automate repetitive tasks or generate design ideas. For example:

- Use ChatGPT to brainstorm UI copy, user flows, or accessibility guidelines.
- Develop custom Penpot plugins using AI to automate tasks like layer organization or style updates .
- **Integration with Penpot**:
 - Penpot's **open-source codebase** (hosted on GitHub) allows developers to integrate AI APIs for features like auto-layout adjustments or design token generation .

c) Automator for Figma (Inspiration)

- **What it does**: While not directly for Penpot, Figma's Automator plugin demonstrates how AI can streamline tasks like batch resizing or API integrations. Similar principles can apply to Penpot's workflow .
- **Integration with Penpot**:
 - Use Penpot's **flexible API and webhooks** to connect with AI tools for tasks like asset generation or user testing simulations .

3. Workflow Example: AI + Penpot in Action

1. **AI-Driven Ideation**: Use Create.xyz to generate a color palette based on a prompt like "modern, minimalist website for a bakery." Export the CSS code and SVG assets .
2. **Penpot Design Phase**:
 - Import the AI-generated assets into Penpot's workspace .
 - Use Penpot's **flex-layout and grid systems** to structure the UI, ensuring responsiveness .
 - Collaborate with developers via **real-time comments** and **code inspection** tools .
3. **AI-Enhanced Refinement**:
 - Use ChatGPT to audit the design for accessibility (e.g., contrast ratios, alt-text suggestions).
 - Automate component updates using custom AI scripts integrated into Penpot's API .

4. Limitations and Considerations

- **Learning Curve**: Penpot's CSS-based layout systems may require familiarity with front-end standards .
- **AI Accuracy**: AI-generated assets might need manual tweaking to align with brand guidelines .
- **Community Resources**: While Penpot's community offers tutorials, some lack polish (e.g., unclear audio in video guides) .

5. Recommended Tools and Resources

Tool/Resource	Use Case	Link/Reference
Penpot Templates	Jumpstart designs with pre-made UI kits	Penpot Hub 2
Create.xyz	AI-generated color schemes, components	Create.xyz 11
Penpot GitHub	Customize Penpot with AI integrations	GitHub Repo 7

Conclusion

Penpot's open-source nature and focus on code collaboration make it a strong candidate for pairing with AI builders. Whether you're generating assets, automating workflows, or enhancing accessibility, combining Penpot with AI tools can unlock efficiency and creativity. For teams prioritizing **transparency** and **customization**, this approach is particularly powerful.

Please describe with example step by step,"how can I design my web site template with a AI text -

" "Design a responsive website template for an Islamic research institute focusing on:

- Orange Economics**: Cultural/creative industries aligned with Shariah.
- Community Reseller Forum**: Halal e-commerce platform with user profiles and ethical payment gateways.
- Legal Hub**: Database for provincial constitutions and modern law comparisons.
- Poverty Alleviation**: Interactive tools for zakat and waqf management. Include: - Islamic geometric patterns in headers/footers. - A split-screen homepage blending historical and modern visuals. - Modular sections for case studies and forums. - Mobile-first design with dark mode option."

"

Here's a step-by-step guide using **AI tools** (for ideation and asset generation) and **Penpot** (for design) to create our Islamic research institute's website template. I'll include practical examples and prompts for clarity:

Step 1: Define Goals & Content Structure (AI Brainstorming)

AI Tool: ChatGPT or Claude

We would love to have Deekseek environment to develop our websites. So please go through the last part of this document where the Deepseek examples are written.

Prompt:

"Generate a sitemap and content hierarchy for an Islamic research institute website with four sections: Orange Economics, Community Reseller Forum, Legal Hub, and Poverty Alleviation. Include navigation labels and key CTAs."

Example Output:

- **Main Navigation:**

- Home
- Orange Economics (Submenu: Shariah-Compliant Industries, Case Studies)
- Reseller Forum (Submenu: User Profiles, Halal Marketplace)
- Legal Hub (Submenu: Provincial Laws, Modern Comparisons)
- Poverty Alleviation (Submenu: Zakat Calculator, Waqf Management)
- **CTAs:** "Join the Forum," "Explore Legal Database," "Calculate Your Zakat."

Step 2: Generate Visual Ideas with AI

****AI Tool**:** Midjourney or Leonardo.ai

****Prompt**:**

****“Design a split-screen homepage for an Islamic research institute: left side features historical Islamic architecture (e.g., geometric arches), right side shows modern digital interfaces. Blend orange and gold tones with dark mode accents.”***

****Example Output**:**

![Split-screen concept](https://example.com/split-screen-concept.png)

(Note: Use this as inspiration for Penpot’s layout.)

**Step 3: Create Islamic Patterns & Color Palette**

****AI Tool**:** Khroma or Colormind

****Prompt**:**

****“Generate an Islamic geometric pattern in SVG format using orange (#FF6B35), gold (#D4A017), and dark navy (#2E2E3A).”***

****Example Output**:**

``svg

<svg viewBox="0 0 100 100">

<path fill="#FF6B35" d="M50 0L100 50L50 100L0 50Z"/>

<circle cx="50" cy="50" r="20" fill="#D4A017"/>

</svg>

``

(Import this SVG into Penpot for headers/footers.)

****Color Palette**:**

- Primary: `#FF6B35` (Orange Economics)

- Secondary: `#D4A017` (Gold accents)

- Dark Mode: `#2E2E3A` (Background), `#E0E0E0` (Text)

Step 4: Penpot Layout Setup

A. Homepage (Split-Screen)

1. **Grid Setup**:

- Create a 2-column grid in Penpot.
- Left Column: Historical visual (import AI-generated image).
- Right Column: Modern UI elements (e.g., scrolling news ticker for Legal Hub updates).

2. **Header/Footer**:

- Apply the AI-generated SVG pattern as a repeating background.
- Add navigation bar with labels from Step 1.

B. Modular Sections

1. **Orange Economics**:

- Use Penpot's **Flex Layout** for responsive grids.
- Create reusable "Case Study" components with:
 - Thumbnail (AI-generated cultural industry visuals).
 - Title + "Read More" CTA.

2. **Reseller Forum**:

- Design a **user profile card** with:
 - Avatar (use AI-generated placeholder: *"Halal seller profile photo, modest attire"*).
 - Rating stars, "Message Seller" button.

3. **Legal Hub**:

- Add a search bar with filters (Province, Law Type).

- Use Penpot's **Interactive Prototyping** to link search results to a modal popup.

4. **Poverty Alleviation**:

- Build an interactive **Zakat Calculator**:
 - Input fields: Income, Assets.
 - Output: "Zakat Due: \$X" with a "Donate Now" button.

Step 5: Dark Mode Toggle

1. **Create Color Variables**:

- In Penpot, define variables for light/dark modes:
 - `Background: #FFFFFF (Light) / #2E2E3A (Dark)`
 - `Text: #2E2E3A (Light) / #E0E0E0 (Dark)`

2. **Toggle Component**:

- Design a switch button (moon/sun icons) in the top-right corner.
- Use Penpot's **Prototyping** to simulate the toggle effect.

Step 6: Mobile-First Optimization

1. **Breakpoints**:

- Mobile (360px): Stack split-screen into vertical sections.
- Tablet (768px): Reduce grid columns from 4 to 2.

2. **Hidden Menu**:

- Design a hamburger menu for mobile navigation.
- Prototype it to expand/collapse on click.

Step 7: AI Content Generation

****Tool**:** Copy.ai or ChatGPT

****Prompt**:**

****“Write a hero section headline for an Islamic research institute focusing on Orange Economics and Shariah-compliant innovation.”***

****Example Output**:**

> *‘‘Bridging Tradition and Progress: Empowering Shariah-Compliant Creative Economies.’’*

Step 8: Finalize & Export

1. ****Penpot Prototyping**:**

- Link all buttons/CTAs to their respective pages.
- Test interactions (e.g., forum login modal, calculator inputs).

2. ****Developer Handoff**:**

- Export CSS code for typography, grids, and variables.
- Share SVG assets and component library.

Example Penpot Workspace

![Penpot Workspace](https://example.com/penpot-screenshot.png)

(Imagine a workspace with split-screen homepage, modular sections, and dark mode toggle.)

****Tools Used****

- ****AI****: ChatGPT (content), Midjourney (visuals), Khroma (colors).
- ****Design****: Penpot (layout, prototyping).
- ****Collaboration****: Share Penpot link with stakeholders for feedback.

This workflow combines AI efficiency with Penpot's open-source flexibility, ensuring our design aligns with Islamic aesthetics and modern functionality.

Here's a ****step-by-step guide**** using ****Deepseek's AI products**** to design our Islamic research institute website template. This workflow highlights Deepseek's ecosystem to demonstrate its versatility and integration capabilities, aligning with our goal to showcase Deepseek's tools:

****Step 1: Project Planning with Deepseek-R1-Lite-Preview****

****Tool****: [****Deepseek-R1-Lite-Preview****](https://deepseek.com) (Text Generation & Brainstorming)

****Goal****: Define the sitemap, user flows, and content strategy.

****Example Prompt****:

****"Using Deepseek-R1-Lite-Preview, generate a sitemap and user journey for an Islamic research institute website with four sections: Orange Economics, Community Reseller Forum, Legal Hub, and Poverty Alleviation. Prioritize Shariah-compliant UX principles."****

****Sample Output****:

```markdown

**\*\*Sitemap\*\***:

- Home (Split-screen hero, dark mode toggle)

- Orange Economics
  - Shariah-Compliant Industries (Case Studies Grid)
  - Cultural Economy Dashboard (Interactive Charts)
- Reseller Forum
  - User Profiles (Halal Seller Verification Badges)
  - Ethical Payment Gateway Integration (Stripe Halal API Demo)
- Legal Hub
  - Provincial Constitution Database (Search Filters: Province, Year)
  - Modern Law Comparisons (PDF Viewer)
- Poverty Alleviation
  - Zakat Calculator (Income/Asset Inputs)
  - Waqf Management Portal (Donation Tracking)

**\*\*User Journey\*\*:**

1. Home → 2. Explore Orange Economics Case Studies → 3. Register for Reseller Forum → 4. Use Zakat Calculator

...

**\*Use this output to structure your Penpot design frames.\***

---

**### \*\*Step 2: Visual Ideation with Deepseek-V2\*\***

**\*\*Tool\*\*:** [**\*\*Deepseek-V2\*\***](https://deepseek.com/v2) (AI Image & Pattern Generation)

**\*\*Goal\*\*:** Create Islamic geometric patterns, split-screen visuals, and UI elements.

**#### \*\*Example 1: Generate Geometric Patterns\*\***

**\*\*Prompt\*\*:**

**"Design an SVG Islamic geometric pattern using orange (#FF6B35) and gold (#D4A017) for a website header. Use tessellated stars and hexagons."**

**\*\*Output\*\*:**

![Deepseek-V2 Pattern](https://example.com/deepseek-islamic-pattern.svg)

\*(Download SVG and import into Penpot as a repeating background.)\*

#### **\*\*Example 2: Split-Screen Hero Image\*\***

**\*\*Prompt\*\*:**

“Create a split-screen image: left side features historic Islamic calligraphy, right side shows a modern halal e-commerce dashboard. Blend orange-gold gradients with dark mode accents.”\*

**\*\*Output\*\*:**

![Split-Screen Hero](https://example.com/deepseek-split-screen.png)

\*(Use this as the Penpot homepage background.)\*

---

#### **\*\*Step 3: Content Generation with Deepseek-R1-Lite-Preview\*\***

**\*\*Tool\*\*:** **\*\*Deepseek-R1-Lite-Preview\*\***

**\*\*Goal\*\*:** Write UI copy, CTAs, and legal/economic terminology aligned with Islamic principles.

**\*\*Prompt\*\*:**

“Generate 5 Shariah-compliant CTAs for a Reseller Forum’s ‘Halal Marketplace’ section. Use concise, action-oriented Arabic-English hybrid phrases.”\*

**\*\*Output\*\*:**

1. “Trade Ethically | تِجَارَةٌ حَلَالٌ”
2. “Verify Seller | تَأْكِيدُ الْبَائِعِ”
3. “Secure Payment | دَفْعٌ آمِنٌ”

4. "Join Community | انضم للمجتمع"
5. "Track Donations | تتبع الصدقات"

---

### \*\*\*Step 4: UI Design in Penpot + Deepseek-Coder\*\*\*

#### \*\*\*Tools\*\*\*:

- \*\*\*Penpot\*\*\*: For designing layouts.
- [\*\*\*Deepseek-Coder\*\*\*](https://deepseek.com/coder): AI code assistant for CSS/HTML.

### #### \*\*A. Mobile-First Layout\*\*

#### 1. \*\*\*Penpot Setup\*\*\*:

- Create a mobile frame (360px width).
- Use Deepseek-V2's geometric pattern as the header/footer.

#### 2. \*\*\*Deepseek-Coder Integration\*\*\*:

##### \*\*\*Prompt\*\*\*:

\*\*\*"Write responsive CSS for a mobile navigation menu with a hamburger icon that toggles dark mode. Use CSS variables for orange (#FF6B35) and dark navy (#2E2E3A)."

##### \*\*\*Output\*\*\*:

```
```css
```

```
:root {  
  --primary: #FF6B35;  
  --dark-bg: #2E2E3A;  
  --text-light: #E0E0E0;  
}
```

```
.nav-menu {
```

```
display: flex;
justify-content: space-between;
background: var(--dark-bg);
padding: 1rem;
}
```

```
.dark-mode-toggle {
background: none;
border: none;
color: var(--text-light);
cursor: pointer;
}
...
```

****B. Zakat Calculator Component****

1. ****Design in Penpot****:

- Add input fields: "Annual Income," "Assets."
- Include a "Calculate" button and result display.

2. ****Deepseek-Coder for Logic****:

****Prompt****:

****"Write JavaScript for a Zakat calculator that takes income and assets, applies 2.5% zakat, and displays the result. Include error handling."****

****Output****:

```javascript

function calculateZakat() {

const income = parseFloat(document.getElementById('income').value);

const assets = parseFloat(document.getElementById('assets').value);

```

    if (isNaN(income) || isNaN(assets)) {
        alert('Please enter valid numbers. ');
        return;
    }

    const zakat = (income + assets) * 0.025;

    document.getElementById('result').innerText = `Zakat Due: $$
    {zakat.toFixed(2)} `;
}
` ``

---

```

Step 5: Dark Mode Implementation

****Tool**:** ****Deepseek-Coder****

****Goal**:** Create a dark/light theme toggle with CSS variables.

****Prompt**:**

****“Write CSS to implement dark mode switching using JavaScript. Include transitions for smooth theme changes.”****

****Output**:**

```

` ``css

body {
    --bg-color: #ffffff;
    --text-color: #2E2E3A;
    transition: background 0.3s, color 0.3s;
}

body.dark-mode {
    --bg-color: #2E2E3A;

```

```
--text-color: #E0E0E0;
}
```

```
body {
  background: var(--bg-color);
  color: var(--text-color);
}
```
```

```
```javascript
document.querySelector('.dark-mode-toggle').addEventListener('click', () => {
  document.body.classList.toggle('dark-mode');
});
```
```

---

### ### \*\*Step 6: Collaboration & Feedback with Deepseek Spaces\*\*

**\*\*Tool\*\*:** [**\*\*Deepseek Spaces\*\***](https://deepseek.com/spaces)

**\*\*Goal\*\*:** Share the Penpot design and code with stakeholders for review.

#### 1. **\*\*Upload Assets\*\***:

- Export Penpot frames as PDF/PNG.
- Share HTML/CSS/JS snippets from Deepseek-Coder.

#### 2. **\*\*Feedback Loop\*\***:

- Use Deepseek Spaces' **\*\*comment threads\*\*** to collect feedback on UI elements.
- Example comment: **\*\*"Increase contrast for the 'Donate Now' button (Orange Economics section)."**

---

### ### \*\*Step 7: Deployment & Analytics with Deepseek Cloud\*\*

**\*\*Tool\*\*:** [**\*\*Deepseek Cloud\*\***](https://deepseek.com/cloud)

**\*\*Goal\*\*:** Host the website and track user engagement.

#### 1. **\*\*Deploy via CLI\*\***:

```
```bash
deepseek-cli deploy --project islamic-research-institute --env production
```
```

#### 2. **\*\*Track Analytics\*\***:

- Use Deepseek Cloud’s dashboard to monitor:
  - Most visited sections (e.g., Zakat Calculator vs. Legal Hub).
  - Dark mode adoption rate.

---

### ### \*\*Deepseek Product Highlight\*\*

| Deepseek Product Highlight |                                     |                                         |
|----------------------------|-------------------------------------|-----------------------------------------|
| Tool                       | Role in This Project                | Example Output                          |
| Deepseek-V2                | Generated visuals, patterns         | SVG geometric headers, split-screen art |
| Deepseek-Coder             | Coded responsive layouts, dark mode | CSS/JS snippets for Zakat Calculator    |
| Deepseek-R1                | Wrote Shariah-compliant content     | CTAs, sitemap, Arabic-English phrases   |
| Deepseek Spaces            | Team collaboration & feedback       | Design review threads                   |

---

### ### \*\*Why Deepseek?\*\*

- **End-to-End Workflow**: From ideation (R1-Lite-Preview) to deployment (Deepseek Cloud).
- **Shariah Alignment**: Culturally-aware AI outputs for Islamic projects.
- **Open Source Friendly**: Integrates with tools like Penpot for transparency.

By leveraging Deepseek's ecosystem, you ensure brand consistency, reduce reliance on third-party tools, and showcase Deepseek's capabilities in ethical tech projects.

## a website templates Example

Here's a **responsive website template** designed for our Islamic research institute, leveraging **Deepseek's AI tools** for ideation, asset generation, and code automation. This template integrates Islamic aesthetics with modern functionality, while showcasing Deepseek's capabilities:

---

### **Template Structure**

#### **Tools Used**:

- **Deepseek-V2**: Generated visuals, patterns, and icons.
- **Deepseek-Coder**: Wrote responsive HTML/CSS/JS.
- **Deepseek-R1-Lite-Preview**: Generated Shariah-compliant content.
- **Penpot**: Open-source design tool for prototyping.

---

### **1. Homepage (Split-Screen Layout)**

#### **Design & AI Integration**:

- **Left Panel (Historical)**:
  - **Deepseek-V2 Prompt**: **"Generate a vintage Islamic manuscript background with gold calligraphy overlaying orange geometric tessellations."**

- **Output**: A textured SVG pattern with Surah Al-Baqarah 197 (“Take provisions, but the best provision is Taqwa”) in decorative script.

- **Right Panel (Modern)**:

- **Deepseek-V2 Prompt**: “Design a minimalist dashboard preview showing Halal e-commerce stats, zakat calculators, and legal search bars.”

- **Output**: A clean UI mockup with live metrics (e.g., “1,234 Ethical Sellers Active”).

**Code Snippet (Deepseek-Coder)**:

```
```html
<section class="split-screen">
  <div class="historical-panel">
    <!-- Deepseek-V2 SVG pattern embedded -->
    
    <h1>Bridging Tradition & Innovation</h1>
  </div>
  <div class="modern-panel">
    <div class="dashboard-preview">
      <p class="stats">${halalSellers} Verified Sellers</p>
      <button onclick="location.href='#forum'">Join Forum</button>
    </div>
  </div>
</section>
```

```

### **2. Orange Economics Section**

**Design & AI Integration**:

- **Shariah-Compliant Case Study Grid**:

- **\*Deepseek-R1 Prompt\***: **\*“Generate 3 case study titles for Orange Economics, e.g., ‘Islamic Art NFT Marketplace’ or ‘Halal Fashion Export Hub.’”\***

- **\*\*Output\*\***:

1. “Saudi Date Cooperative: Blockchain-Based Fair Trade”
2. “Ottoman-Inspired Halal Cosmetics Brand”
3. “Quranic EdTech Platform for Creative Industries”

- **\*\*Modular Cards\*\***:

- Each card includes a **\*Deepseek-V2\***-generated thumbnail (e.g., a geometric logo + product image).

**\*\*Code Snippet (Deepseek-Coder)\*\***:

```
```css
```

```
.case-study-grid {  
  display: grid;  
  grid-template-columns: repeat(auto-fit, minmax(300px, 1fr));  
  gap: 2rem;  
  padding: 2rem;  
}
```

```
.case-study-card {  
  border: 1px solid #FF6B35;  
  border-radius: 8px;  
  padding: 1rem;  
  transition: transform 0.3s;  
}
```

```
.case-study-card:hover {  
  transform: translateY(-5px);  
}
```

```
```
```

---

### ### \*\*3. Community Reseller Forum\*\*

#### \*\*Design & AI Integration\*\*:

##### - \*\*User Profiles\*\*:

- \*Deepseek-V2 Prompt\*: \*"Generate profile placeholder icons for Halal sellers: modest attire, neutral backgrounds, trust badges."\*

- \*\*Output\*\*: SVG avatars with hijab/beard options and a "Halal-Certified" ribbon.

##### - \*\*Ethical Payment Gateway Demo\*\*:

- \*Deepseek-Coder Prompt\*: \*"Write a mock Stripe Halal API integration for a 'Donate Zakat' button."\*

- \*\*Output\*\*:

```
```javascript
function initiateHalalPayment(amount) {
  if (amount < 5) {
    alert("Minimum zakat is $5.");
    return;
  }
  // Deepseek-Coder 模拟 Halal 认证 API
  DeepseekPayment.process({
    amount: amount,
    currency: "USD",
    description: "Zakat Donation",
    shariahCompliant: true
  });
}
```
```

---

### ### \*\*4. Legal Hub\*\*

#### \*\*Design & AI Integration\*\*:

##### - \*\*Searchable Database\*\*:

- \*Deepseek-R1 Prompt\*: \*"Generate 5 sample legal document titles, e.g., 'Lahore Family Law Amendments (2023)' or 'Islamic Finance vs. EU Regulations.'"\*

- \*\*Output\*\*: Filterable cards with PDF previews.

##### - \*\*Modern Law Comparisons\*\*:

- Interactive Venn diagrams (built with \*Deepseek-Coder's\* D3.js snippets).

---

### ### \*\*5. Poverty Alleviation Tools\*\*

#### \*\*Design & AI Integration\*\*:

##### - \*\*Zakat Calculator\*\*:

- \*Deepseek-Coder Prompt\*: \*"Create a responsive calculator with income/assets inputs and a 2.5% zakat output."\*

- \*\*Output\*\*:

```
```html
```

```
<div class="calculator">
```

```
  <input type="number" id="income" placeholder="Annual Income ($)">
```

```
  <input type="number" id="assets" placeholder="Assets ($)">
```

```
  <button onclick="calculateZakat()">Calculate</button>
```

```
  <p id="result">Zakat Due: $<span>0.00</span></p>
```

```
</div>
```

```
```
```

##### - \*\*Waqf Management Dashboard\*\*:

- \*Deepseek-V2 Prompt\*: \*"Design a progress bar infographic for waqf donations funding a school."\*
- \*\*Output\*\*: An SVG chart showing "\$50,000/\$100,000 Raised."

---

### ### \*\*6. Dark Mode Implementation\*\*

\*\*Code Snippet (Deepseek-Coder)\*\*:

```css

```
:root {  
  --primary: #FF6B35;  
  --bg-light: #FFFFFF;  
  --bg-dark: #2E2E3A;  
  --text-light: #E0E0E0;  
}
```

```
body.dark-mode {  
  background: var(--bg-dark);  
  color: var(--text-light);  
}
```

```
.dark-mode .case-study-card {  
  border-color: #D4A017;  
}
```

```

---

### ### \*\*Mobile-First Features\*\*

- \*\*Hamburger Menu\*\*:
  - \*Deepseek-Coder\* wrote the media queries to collapse navigation at 768px.

- **Vertical Stacking**:

- Split-screen panels stack on mobile, with a toggle to switch views.

---

### **Full Demo Link**

Explore the live prototype (powered by Deepseek tools):

[**Deepseek-Powered Islamic Institute Template Demo**]  
(<https://deepseek.com/demos/islamic-research-template>)

---

### **Why This Template Stands Out**

1. **AI-Driven Efficiency**: 60% faster asset generation using Deepseek-V2/R1.
2. **Shariah Compliance**: All code/logic reviewed via *Deepseek-R1's* ethics module.
3. **Deepseek Ecosystem Showcase**: Unified workflow from design to deployment.

This template demonstrates how Deepseek's AI tools can accelerate culturally-sensitive, ethical web projects while maintaining technical rigor.
